

## Sponge Media™ for Profiling and Abrading

# Choose the perfect composite abrasive to satisfy the specification

**REDUCE**  
**90% OF**  
**THE DUST**  
**90% OF**  
**THE REBOUND**  
**90% OF**  
**THE WASTE**

Sponge-Jet offers standard and specialty abrasives, which can meet any specification while lowering the airborne dust, rebound and waste associated with conventional abrasives. Remove industrial coatings, abrade or profile up to 100+ microns (4+ mils). As a result save time, lower costs, accelerate blast and paint operations, and extend the coating life with high-quality surface preparation.

### Silver Sponge Media™

Combines one of the world's hardest and most effective abrasives (aluminum oxide - mohs hardness 9) with the durability and recyclability of Sponge Media and a range of grit sizes to address virtually every application.
